HANDPRESSO PORTABLE ESPRESSO MACHINE

The Handpresso Portable Espresso Machine is your ultimate go-anywhere espresso machine. Small and convenient, the Handpresso travels with you on vacation/business trips, hiking, boating - anywhere that you would like to enjoy a premium quality espresso, cappuccino, Americano, or latte! The Handpresso is a simple and compact Nomadic Espresso maker. All you need is some boiling water and any E.S.E Pod, or ground coffee, no matter where you are. This also eliminates the mess associated with espresso making while on the go. Just pump up the Handpresso

until the needle is in the green area on the Pressure gauge; this says you're at 16 bars of pressure, now you can add hot water from a kettle or a thermo-insulated bottle.

Place the E.S.E. pod or ground coffee in the filter, close the top and press the button to dispense the espresso! It's never been easier or required less clean up to make your espresso or cappuccinos until now! Cleaning is a breeze, simply just wash out under a tap. It really can't be any more hassle free than that!

You can order your Handpresso Pump from the very awesome Randomly website (www.randomly.co.za) for R1,589.

BRAVEN 705 / WIRELESS BLUETOOTH SPEAKER

This fantastic speaker is available exclusively at iStore for a recommended selling price of R1699.

The Braven team never fail to surprise us with the latest additions to their product ranges. So when we saw the new Braven 705 Wireless Bluetooth speaker, we had to get our hands on it. The lightweight portability meets big sound and offers a custom high-fidelity audio drivers delivering room-filling sound to your music, media, conference calls and more. Using the built-in noise-cancelling microphone, you can make and take calls wirelessly.
